

ABSTRACT

The bachelor thesis on the topic "Leisure activities of secondary school students" deals with the leisure time of youth at the secondary health school in Most. The thesis maps the issue of their activities and activities in their leisure time. The theoretical part of this bachelor thesis defines the concept of leisure time, leisure time activities, the function of leisure time and factors influencing leisure time activities. Furthermore, this work explains education in leisure time, and above all, the function of education and content of education. Part of the thesis is devoted the risky behavior of pupils, both the types of risky behavior of individuals and possible steps that can be taken to prevent this behavior. Part of the work is devoted to social networks, on which students spend a lot of their leisure time. In the practical part of bachelor thesis, the data from the questionnaire survey are processed. The aim of the bachelor's thesis is to find out how students at the secondary medical school in Most spend their leisure time. The primary goal is to find out whether the students are satisfied with the amount of their leisure time, its content, and what activities they engage in their leisure time. It is also necessary to find out whether they use leisure activities in the city and if applicable, which of them they are using. Based on the questionnaire survey, the above-mentioned goal was achieved.
