

## **Abstract**

**Title:** School in nature in primary education in the Karlovy Vary Region

**Objectives:** Find out the content of schools in nature at the 1st grade of elementary schools in the Karlovy Vary region.

**Methods:** The bachelor's thesis uses a quantitative approach to research. The necessary information was obtained by the questionnaire survey method. The research group consisted of 10 teachers from primary schools in the Karlovy Vary region.

**Results:** The results show that primary schools organize outdoor schools. The program of outdoor schools mainly includes hiking in outdoor activities. Primary schools do not use the help of agencies dealing with outdoor schools, but prepare a program for pupils independently.

**Keywords:** outdoor education, outdoor activities, primary school, primary education.
