Průběh obhajoby: The student offered a rich and competent presentation of his thesis, demonstrating a deep understanding of the researched area. Similar to the thesis, which is very long and rich, the student tried to also cover a lot of material in the presentation, as a result of which he had to speak fast, making it occasionally hard to follow the structure and content of the presentation. The committee agree with the referees that the thesis differs substantially from most theses at the IES, as it is quite broad and tackles the studies topic from different angles, rather than making a clearly defined contribution in one particular dimension. The committee is open to such approach and appreciated the author's original contribution to an important and, seemingly, underresearcher area. The committee, however, felt that the various pieces of analysis by the student were somewhat exploratory and could be taken further were the thesis more focused. For these reasons, the committee decided to differ from the grade A suggested by both the supervisor and the opponent and award the grade B.
