

ABSTRACT

The bachelor's thesis entitled "Lecturer of suburban camps" deals with the professional prerequisites that a lecturer of suburban camps should have. The theoretical part of the thesis explains the professional areas of free time pedagogy, which are closely related to the teaching activity. It also deals with basic legislation that concerns teaching staff and suburban camps. The aim of the bachelor's thesis is to compare the requirements of the lecturers and the demands of the organizers for a new lecturer and, based on this, to propose the structure of the selection process and the content of the refresher course for lecturers with non-pedagogical education. The output of the research part of the work is to describe the professional requirements of the organizers for potential lecturers based on interviews. I also deal with pedagogical education and the experience of lecturers. At the end of the work, I present the recommendations resulting from the interviews for the organizers of suburban camps.
