

ABSTRACT

Diploma thesis *Unemployment in the Kladno district and its socio-economy impact* analyses process of unemployment in the Kladno district in the last 30 years. This process is compared to other districts in the Central Bohemian Region. The thesis describes particular socio-economy issues related to unemployment. Other part of thesis includes labour market in the Kladno district and its local largest employers. Employment policy in this area is also part of the research and is represented by labour offices.

The first chapter includes general terminology connected to unemployment. Next chapters focus on the local situation of unemployment in the Kladno district. Firstly is described progress of unemployment rate and its calculation changes in the last 30 years in the Czech Republic. The third part specifies employment policy represented by involved institutions. The fourth chapter deals with socio-economy related problems and with main socio-economy problems in Kladno district. The fifth part describes situation of labour market in the Kladno district. The crucial progress related to the economic sector in the Kladno district is mentioned in the last part of the thesis.
