Ivo Skola: Research on religious knowledges among Christians in area of Ceska Lipa  
Bachelor work

This bachelor work is focused on preparation, process and way of elaboration of the research on primary religious knowledges. On the basis of available theological literature there were determined primary theological knowledges for a purpose of elaboration of a file of questions that were processed in a questionnaire after a confirmation of a small group of believers. The questions were chosen from these theological areas: Testimony, liturgy and time, sacraments, the secret of the Trinitarian God and Mariology. There is an emphasis on intelligibility of the questions and speed of processing the questionnaire by respondents. Selection of believers was realized from the practising Christians in selected parishes in Ceska Lipa, Novy Bor and Cvikov. The selected parishes come under diocese of Litomerice.

The aim of this work was to verify levels of religious knowledges in definite area on selected group of people and subsequent comparison of mutual relations realized by the investigation. The clerical staff of the selected parishes will be notified about results of the research.

Five key words:

Primary religious knowledges

Testimony
