

The theme of my thesis Ectopic pregnancy I chose from several reasons. In early studies on 3.LF I had a great interest in the field of gynecology and Obstetrics and wanted to pay him in the future. Although I later fundamentally changed its decision, the issue is still interested in menot only from a medical point of view but also from the perspective of my ownor as a gynecological clinic clients and possibly one in the futuremotherhood. Also, because with this diagnosis that I met in my close circle of family, whererelatively It took a long time before being detected. This is also another motivefor me to get on this clinical situation as much information as possible.
