

Abstract

Title: A case report of physiotherapeutic care of a patient after stroke with left-sided hemiparesis

Objectives: The aim of the bachelor thesis is to elaborate the theoretical knowledge dealing with stroke and the practical part including a case study of a patient after stroke with left-sided hemiparesis

Summary: The bachelor thesis was created on the basis of a four-week continuous internship at the Hospital Milosrdných sester sv. Karla Boromejského in Prague, in the rehabilitation department from 22 January 2024, to 16 February 2024. The thesis is divided into a theoretical part, dealing with cerebrovascular accident, and a practical part containing the methodology of work and a case study of a patient with this diagnosis. In the theoretical part, I focused on the characteristics of cerebrovascular accident and physiotherapeutic procedures. The patient's case study includes the initial examination, 8 therapeutic sessions, and a final follow-up examination including an overall conclusion.

Keywords: CMP, stroke, ischemic stroke, ischemic stroke with left-sided hemiparesis, rehabilitation after ischemic stroke
