

The Diploma Work deals with social climat of a kindergarten. Its aim is to find out what aspects contribute to interrrelations improving.

The teoretical part keeps to a specific proffesional literature, characterizes and defines terms adherent to pre-school education, specifies age differences of pre-school children, focuses on a game and social climat of a gindergarten.

In the practical part there is mapped out a current social climat of a particular gindergarten by a form of an action research. The progression of social climat is monitored by means of outdoor modes and pedagogy of experiences during common activities with parents.
