

## **Abstract**

- Title:** Exploration and questionnaire survey in the field of the application of specialized terminology in Olympic gymnastics sports
- Objectives:** The main aim of the bachelor thesis is to create a questionnaire survey and based on it to determine whether the use of Czech terminology prevails over Anglicisms among coaches of Olympic gymnastics sports, whether coaches believe that the use of specialized terminology enhances training sessions, and in what direction coaches continue their education, if at all.
- Methods:** The method of a purpose-specific questionnaire was chosen for data collection. This questionnaire contained both open-ended and closed questions and was distributed to coaches of Olympic gymnastics sports. The results were processed using the statistical software Jamovi and Microsoft Excel.
- Results:** The survey revealed that respondents tend to use Czech gymnastics terminology rather than Anglicisms during training sessions, believe that specialized gymnastics terminology enhances training sessions, and continue to educate themselves in gymnastics terminology primarily within the framework of rules.
- Keywords:** gymnastics, gymnastics terminology, coach, Olympic gymnastics sports
