

Abstract

This bachelor thesis provides a translation of the Spanish guide *Guía de la dislexia para padres*, published by the nonprofit organisation Adixmur in Murcia. The aim of the guide is to provide information and advice to parents and teachers of dyslexic children. The theoretical part of the work includes a translation analysis of the text, describes the translation method, translation problems and their solutions and the translation shifts that occurred in the text.

Key words: translation, translation analysis, translation method, translation problem, translation shift, dyslexia, specific learning difficulties, parents, pedagogy, Spain
