

## **Abstract**

This bachelor thesis is about donations for the Hospital of Saint Francis of the Knights of the Cross with the Red Star during Reign of John of Luxemburg. The thesis focuses on donation of queen Elisabeth, margrave Charles and especially of the king John. It tries to understand – based on the documents – the relationship between the hospital and the king, the amount of support, which was given to the hospital, as well as the formulations, which were used in the charts. For wider context the documents of the Přemyslovci dynasty are briefly mentioned, too. This thesis also describes current state of research and the literature, which attends to the topic.
