Supervisor: RNDr. Ondřej Bojar Ph.D., Institute of formal and applied Linguistics

Abstract: The topic of this bachelor thesis is text editor assistant. The program tries to anticipate user's intentions and propose their quick accomplishment. The aim of this thesis solves is completely new and its function is not available even in advanced text editors. The topic is inspired by the user's interface of the programming environment Visual Studio, which sometimes proposes the program code the user is probably going to write. The assistant uses morphological analyses provided by Morphodita to analyse sentences morphologically.

Keywords: sentence analysis, Czech dictionary, Morphodita tagger, autocomplete
