

Report on the master thesis „ Macedonian Identity throughout History : Church, Language and Nation“ by Dimoski Čedo.

As an official supervisor of this thesis I have to confirm that author did not consult with me regularly his work. Unfortunately the thesis does not fullfill criteria required for master thesis. Very pure is a list of literature. There is also luck of clear metodology. Structure of the thesis and the contents is also reflecting a luck of critical analysis which is unfortunately visible by reading whole work.
