Year of defense:	2025
Keywords:	cervical cancer, prevention, HPV virus, precancer

The bachelor's thesis focuses on the prevention of cervical cancer among selected groups of women aged 20 to 30.

The theoretical part of the thesis deals with the anatomy of the female reproductive organs, risk factors for cervical cancer, the human papillomavirus (HPV), cervical precancerous lesions, cervical cancer itself, and methods of cervical cancer prevention.

The empirical part examines the knowledge of cervical cancer prevention among women from the Czech Republic and Slovakia aged 20 to 30, using a non-standardized questionnaire.
