

## REPORT OF BACHELOR THESIS

Supervisor's name: PhDr. Michaela Prokešová, Ph.D.

Student's name: Klaus Jungbluth

Title of diploma thesis name:  
Gonarthrosis and total knee replacement

Goal of thesis:  
Describe the basic knowledge about gonarthrosis and work up the case study of the patient after total knee replacement

**1. Volume:**

* pages of text	61(49)
* literature	14(13-EL; 1-SpL)
* tables, graphs, appendices	Pic.-2; Tab.-16; App.-5

**2. Seriousness of topics:**

	above average	average	under average
* theoretical knowladges		<b>X</b>	
* input data and their processing		<b>X</b>	
* used methods	<b>adequate</b>		

**3. Criteria of thesis classification**

	degree of evaluation			
	excellent	very good	satisfactory	unsatisfactory
degree of aim of work fulfilment	<b>X</b>			
independence of student during process of thesis		<b>X</b>		
logical constutruction of work	<b>X</b>			
work with literature and citations			<b>X</b>	
adequacy of used methods	<b>X</b>			
design of work (text, graphs, tablels)		<b>X</b>		
stylistic level		<b>X</b>		

4. Usefulness of the thesis outcomes: they can be used

**5. Comments and questions to answer:**

1. Appendices there are not numbered .  
 2. The pattern of the citation is not correct (pictures and list of references).  
 3. Pg.14-Which type of active movements is possible to do in the knee joint?  
 4. Pg.28-For what reason was tested only rectus abdominis from all muscles of the thrunk?

6. Recommendation for defence: YES NO

7. Designed classificatory degree Excellent/Very good  
 according defence

Date: 11.5.2009
