BRANCH OF STUDY: Physical education and sport

THESIS SUPERVISOR: Peadr. Josef Horčic PhD.

**MAPPING OF MATERIAL EQUIPMENT FOR TAKING PART IN
COMPETITION OF WINTER TRIATHLON IN CZECH REPUBLIC**

Aims: Charakterize the term of winter triathlon. Report on comprehensive and well arranged characterization of material equipment for winter triathlon to public and point out specifics of equipment for winter conditions.

Methods: Summarizing study based on method working with documents – content analysis of document. We proceeded from professional literature in my work. Documentary and electronic documents with triathlon, cycling and cross-country skiing theme were used. Then we analyzed our own videodocument from Winter triathlon championship in the Czech Republic in 2009, which was organized in Vimperk. The observation was the last method.

Results: They characterize winter triathlon, the present competitors and material equipment used in the sport. The results contribute to spreading awareness of new sporting branche called winter triathlon.

Key concepts: winter triathlon, characteristics of competitors, controlled interview, material equipment, analysis of the race
