

This diploma thesis, which has titled The Integration of subject a sex education in framework programme, includes content, aim, principles and methods from an area of a sex education. In this part target group is described from biological, psychological and social point of view. The theoretical part deals with four areas of research. For those areas is suggested own programme, which is considered for children in 5th grade of the primary school. After theoretical part follows a research part, where the knowledge of methodology of sex education and its influence on knowledge of pupils is tested. The Practical part is devoted to own programme, which was elaborated for target school and target class of age. This program was partly implemented and evaluated.
