

The topic of my work is research of etopedic prevention in artiphiletic approach to education. Research is composed as qualitative research in action. The essence of my research is design and realization (verification) of artiphiletic program „Creative Atelier". Program of „Creative Atelier" is designed for children of school age placed in institution for children in need of immediate help Klokánek. It is oriented to prevention of CAN syndrome, mental inanition in childhood, emotional and behavioral disorder. Fundamental phenomenons identified in my work are artiphiletic approach to program of „Creative Atelier", actual problems of children and their development during the program. These phenomenons help me to describe the relation between artiphiletics and etopedy.
