	excellent	very good	satisfactory	unsatisfactory
degree of the aim of work fulfilment		x		
depth of analysis of thesis			x	
logical constutruction of work		x		
work with literature and citations				x
Small amount of used literature, mostly based on electronic sources				
adequacy of used methods		x		
design of work (text, graphs, tablels)			x	
Tables are unfinished. Some senteces are also unfinished .				
stylistic level			x	

4. Usefulness of the thesis outcomes: average

5. Comments and questions to answer:

The extent of knowledge is appropriate to bachelor study nevertheless it correspond used sources of literature. The therapeutic approach for pre surgical and post surgical stages are described basic. the practical part shows students ability to set proper short term and long term rehabilitation plans. The day by day does not always correspond with goal of therapeutic unit. In special part the student presented very high level of empathy, which is inseparable part of a positive therapy effect. Question: How may clinical symptoms of Diabetes Mellitus affect quality of standing and

6. Recommendation for defence:

YES

7. Designed classificatory degree
