

This work is a survey of Beroun region in 17th and 18th century based on a study of registries of thirteen randomly selected villages and the city of Beroun, which is the natural centre of this area.

The main description of this work is a research of a frequency of first names in this area, based on an observation of 15 years periods of time taken always at the beginning and at the end of the century.

The work is also focused on a reconstruction of motivation of first name choice taken for the family members. Godfathers, Godmothers, patrociniams of the churches, and it also consults the date of birth.

Based on a excerpcionist materials from the registries it observes the works and the relevant progress in the area of frequency and motivation of first names, it compares the possible differences of village and town neighbourhood.

This work does not end up with any breakthrough, it only confirms the actual facts from specialized publications.
