

# REPORT OF BACHELOR THESIS

Student's name:	Bc. Martina Puchmertlova
Supervisor's name:	Mgr. Miroslava Jalovcova
Defender's name:	Charilaos C. Karaliotas

Topic of diploma thesis:  
"Rehabilitation after Fracture of the Diaphysis of Femur"

Goal of this casuistic work is description of theory related to topic the fracture of the diaphysis of Femur, theoretical approaches, examination and day by day therapy.

Volume:	
Pages of text	70
Signature	20
Tables, pictures	20, 29 and 5 charts

Thoroughness of topics:	above average	average	under average
Theoretical knowledges	x		
Use of data and their processing		x	
Used methods		x	

Criteria of thesis classification	evaluation			
	excellent	very good	satisfactory	unsatisfactory
Quality of the aim of work fulfilment	x			
Quality of analysis of thesis		x		
Quality of construction of work			x	
Quality of work with literature and citations	x			
Quality of used methods		x		
Quality of work (text, graphs, tables)	x			
Quality of work level	x			
Quality of thesis outcomes:		average		

Comments and questions to answer:  
Theoretical part is written with very good knowledge obtained during bachelor study. Some parts show student's work in depth with literature, however their transforming to chapters is not arranged in easy order. Student

ed special attention to bone and surrounding tissues healing processes and again the logical consecution to a text  
synoptic. The practical part reflects students ability react to changes in subjective stage of patient, it is writtent  
ails. Question: How can more difficult cooperation with patient and his premature loading affect stage after  
re? And how may student (physiotherapist) approach affect such patient's behavior?

omendation for defence:

YES

signed classificatory degree

excellent
