

## Annotation

### Family planning in the Catholic Church

The objective of this research is to understand the difference in theoretical and practical approach to family planning in Catholic Church. Contemporary family planning doctrine is not acceptable for some couples within the Church. This work contemplates separation aspect of the conjugal and procreative aspect of the marital intimate life. This research suggests a need to establish an acceptable birth control solution for married couples who due to medical or other reasons cannot utilize methods based on natural feminine cycle.

### Keywords:

natural family planning, contraceptive methods, Catholic Church's doctrine, theology of marriage, control of conception
