

Endeavour of this work is to find responses and provoke reader to think about this so discussed topic nowadays. Presenting text advert to different aspects which are necessary look at. For example, human dignity, human autonomy, historical contexts involved in this topic, or legislative adjustment as well and the others. This text is about problematic of euthanasia in particular context European countries with the view of legislative and ethic, also religious, and opening question whether trade-marked the right for the existence is going hand in hand with the right for human dignity. The text makes efforts to locate the problematic in a set of contexts. One of them is for example medical care, especially palliative care, which is linked maximally with dying and death. The text has to invoke a discussion in a society, which has urgently revalue stance to dying and death from all possible views.
