

This diploma thesis is a theological analysis of synods of Slezská církev evangelická augsburského vyznání (Silesian Evangelical Church of Augsburg Confession) from 1948 to present time. The main goal was to analyse the synodal documents according to specific topics. Every topic is discussed in one chapter of this thesis. The diploma project is divided into three parts. The first section presents a chronologically ordered summary of ŠCEAV synods. The second part is devoted to eight topics which were the main discussions of the synod, which is the main aim of this work. In the third section I present my conclusions.
