<p>Comments: Thesis is well-structured in order to learn from the experience of CEE the lesson for Chinese case. The author produced the thesis that is i) based upon thorough references ii) original evidence-based research relying upon combined set of econometric methods. The author has worked hard to develop the structure commented regularly by the supervisor and adopted accordingly. The proper segments should be offered to professional economic journals.</p>						
<p>Specific Questions for oral defence:</p> <p>1) Any idea for further research that had not been covered yet ?</p> <p>2) Any conclusions for Chinese banks to be derived – pros and cons?</p>
