

This diploma thesis is focused on topics related to specification of academic profile for geography's graduates - Eurobachelor and Euromagister. Required graduate's qualities are presented by terms of learning outcomes including skills, knowledge and contents. According to methodology of Tuning project a research of general and geographical skills was done within group of graduates of Faculty of Science at Charles University in Prague. Research outcomes of HERODOT Network project are used as base for comparison.

The diploma thesis contributes to professional discussion over academic profile also with analysis of key words, European documents, various approaches to geographical object of study, and graduates profiles at Universities in Czech Republic.
