

Abstract

Title

Project of Educational cycle trail in the protected landscape area in Žďárské hills.

Objective

The aim of this work is to create a project of Educational cycle trail in the protected landscape area in Žďárské hills. Processing of the information brochure, which could be distributed to Tourist Information Centres in this region.

Methods

Classification and verification of data based on the discussion with employees of PLA Žďárské hills and collection of information on existing bicycle trails, bicycle tracks, educational trails, natural and cultural assets in the area. Subsequent utilisation of knowledge for creation of Educational cycle trail. Summing up into the information brochure. Minimal verify of results through the inquiry.

Results

The result of this work is a proposal of Educational cycle trail with its potential options in the protected landscape of Žďárské hills, which is processed in the form of information brochure. Brochure includes texts, photos and also maps, which are possible to be used for navigation during the ride. Information brochure is possible to be offered to Turist Information Centres in this area or to be offered in electronic form on the websites of these centres.

Keywords

Educational trail, bicycle trail, bicycle track, Žďárské hills, protected landscape area, biking.
