

Diploma thesis is about hemodialysed patient and their probléme in chosen hemodialysis centres. The thesis is devided into theoretical and empirical part. In theoretical part I tried in singles chapters introduce readers with all neccessary information concerning the problematic the life with dialysis. The goal of diploma thesis was to insight into problematic of hemodialyised patients and redound to the better understanding their life with this machine. Based on the theoretical part, defined goals and hypothesi I set up quastionaire. Thanks to answears of hemodialysed patiens I tried to execute defined goals. The whole research proposes provide deeper knowledges of this topic.
