

The bachelor thesis describes hobby groups for children and young people in library as perspective development, future of libraries. Users prefer stay at home and communicate online to walk to the library. Nowadays discussions talk about future of libraries and their usage. One trend tends to the library as a place for hobby groups for children, young people and general public. This work has the theoretical and practical part. The theoretical part focuses on related legislation in the Czech Republic, summary of bibliopedagogic literature (history, today and future of children's services) and general characterization of hobby groups in library. Practical part of work deals with municipal library in Louny, hobby groups and activities for children and young people included demonstration of art lesson in the library.
