The annotation

In my bachelors´s work I would like to focus on swimming of children in pre-school age. Mainly, I want to interested in games in the water and also the swimming contraptions which develop child activity and next, which can help make him a good reference to water.

In the teoretical part of my work, I would like to decribe a process of evolution of child; try to formulate how the child feel in the water since their birth, secondly, how we can try to help him to make a good relation with water during his first years of life. I´d like also mention concrete fashion of education in the water for pre-school children.

In practical part of my bachelor´s work, I would like to decribe the results of my observing of swimming education of pre-school children. And I want to show the differences between the swimming schools and their styles of education.

Essential words:

Swimming, the water, a swimming pool, a nursery school, a pre-school child
