

The bachelor work Comprehensive rehabilitation of children with developmental dysphasia is focused on forms of rehabilitation for children with dysphasia. In theoretical part I'm engage in define and terminology of the developmental dysphasia, I mention her symptomatology and differential diagnostic. The main part of the work is the chapter about comprehensive rehabilitation of developmental dysphasia, which deal with proper forms of rehabilitatin for children with dysphasia. Important part of this chapter is section about speech-language rehabillitation. Practical part include two casuistry of children with dysphasia. At the end of the work I resume and measure the information, that I gain during the work with the facts. The goal of this work is to introduce components of the comprehensive rehabilitation of developmental dysphasia and describe speech-language rehabilitation for children with developmental dysphasia.
