### **Summary:**

The Bachelor's thesis presents the Helicopter Emergency Service as an important element in a system of Emergency Medical Service. The theoretical part surveys history, progress and shows the effort of all members of the Helicopter Emergency Medical Service. Crux of the thesis is an experiential part incurred on the base of quantitative research by the method of unstandardized questionnaire investigation. The main importance is placed on illustration of mutual cooperation and cooperation and seriousness in the care of patients. In the research investigation in the period March - April 2010 there 25 respondents-doctors and 25 respondents-rescuers working in Jihlava and Hradec Králové at Helicopter Emergency Service participated.
