

English Summary

Graduation thesis: The milestone year 1989 and drugs in the society in the view of an individual. This title covers the elaboration of the drug issue through 1989 in the Czech expert literature, dealing with the period since the advent of socialism up to the present days. The view of an individual, which is very important and crucial for the thesis, attends to the region of Prague, within the set objectives of the research. The work is divided into two main parts: The theoretical part which aims to produce an insight into the general happening first in Czechoslovakia and subsequently in the Czech Republic, using the Czech expert literature dealing with the history of drug problems. Practical part consists of an empirical research that focuses on demonstrating the development direction before 1989 up to these days within the region of Prague in three categories which are closely related, using structured interviews.
