

## Abstrakt

The work is focused on the recent regional history of Karlovy Vary. Trying to briefly imitate life of the Scout group between 1968 - 1989. Based on interview made with the narrators it is describing the activities that were the Scout section devoted. It charts the path of an individual from the first contact with Scouting from its acceptance to life itself in the section. This work is also trying to capture the changes that took place within various sections during the transition from formal to illegality. It illustrates one of the possible methods in which the officially banned organization adjusted to the normalization age.
