

## ANOTACE

Author: Zdeňka Bendová

Theme: Ethics of dying and death in intensive care

Keywords: ethics, dying, death, paliative care, intensive care

Bachelor's thesis is dealing with ethics of dying and death within the scope of intensive care. Medicine offers many possibilities of treatment and disease diagnostics nowadays. Requirement of paliative medicine use is becoming more important with increasing intensive care. Patients can live for a much longer time with a medical machines support as a result of a very high contemporary medical care standard. This situation brings new ethic problems.
