

*MALÁ V. Light and Lighting /Thesis/ Prague 2010. Charles University, Faculty of education, Department of Art education 109 pages*

*My diploma thesis is focused on a light, lighting and their space effect. The aim of this work was to describe use of light and lighting in photographs, films, scenography and in architecture; also it deals with the Czech design of light and lighting with applications of unconventional materials. The second part of this thesis is comprised of my very own lamp design and the use of light theme in art lessons.*
