

## Abstact

The diploma thesis aims to develop the theme „Activities with the paper in education programs pre-primary education”, evaluates the importance of these activities for development of fine motor skills and connections to general educational program for preschool education in the Czech Republic. Through survey the thesis examines the experiences of the kindergarten teachers with realization of activities with paper during their work with children and also current status of necessary equipment for this work in kindergarten. The practical section of this diploma thesis summarizes the experiences with realization of an annual project called „We form with paper“, in mixed-age class of the kindergarten.
