

The thesis deals with the current state of the accessibility of Czech public sector information, with the focus on its easy re-use by the commercial, non-governmental as well as R&D sector. In the beginning, it defines information society and basic terms, such as public sector, public sector information and public sector content, the typology of public sector information and the meaning of its re-use. Furthermore, the system conditions of the public sector information re-use are evaluated and the information market is described in general. The next chapter provides the overview of the most important information products of the Czech public sector, which are suitable for the re-use. The last chapter contains the analysis of the accessibility of the public sector information in meaning of its re-use, based on the results of the desk and field research.
