

## Summary

The thesis „Educational Activities in Family and Maternity Centers“ discusses family and maternity centers in Czech republic. The work explores the changes in the roles of motherhood and fatherhood and puts them into the context of the functions of family and maternity centers. In the thesis is explained possible sorting of centers and history of family and maternity centers in Czech republic and Germany, where the concept originated.

A great deal of the thesis is devoted to educational activities in family and maternity centers. Presented are educational activities of Síť mateřských center (Network of maternity centers in Czech republic) and Ligy otevřených mužů (Open men's league) in collaboration with family and maternity centers. Closer is described four Prague center (A centrum, Nová Trojka, Pecička and Children clubs Karlík and Osmík), which have a different history, formal organization and preoccupation. Differences in educational activities in these centers are put into context with other facts and the development of family and maternity centers in Czech republic.
