Title: Mistakes of Czech pupils in the pronunciation of German numerals and the pronunciation of numerals in the textbooks of German language.

Number of pages: 94

Title:

Mistakes of Czech pupils in the pronunciation of German numerals and the pronunciation of numerals in the textbooks of German language.

Summary:

The aim of the thesis is to reveal mistakes which Czech pupils make in the pronunciation of German numerals. For the research the the method of observation has been chosen which has been carried out through recording of the pronunciation. Afterwards the recordings were analysed. Due to the analysis we can identify difficult phenomena and numerals. In the second part of the thesis some textbooks have been analysed from the phonetic point of view. The aim of the analysis is to find textbooks which work with the pronunciation in a sophisticated way. Consequently, there are suggested some exercises which can help improve the quality of pronunciation of German numerals by Czech pupils.
