Title:

Physicaltherapy of acute stadium cerebrovascular accident CVA

Abstract:

This Bachelor's Thesis deals with physicaltherapy of acute stadium cerebrovascular akcident. The Thesis is divided into theoretical and practical part. The former is concerned with mostly with remedial therapy – both acute and subacute. The latter includes a qualitative treatment of two casuistries in which the combination of PNF method and Dr. Václav Vojta's principle was applied within the therapy. For verification, the results from the examines carried out before and after the therapy were compared.

Key words:

CVA, Cerebrovascular accident, neurorehabilitation, rehabilitation of hemiparesis, neurology, physicaltherapy for CVA.
