

## Abstract

The aim of my bachelor's thesis is comparison of Czech and English verb idioms. The bachelor's thesis consists of two parts. The first part is theory. In this part I focused on the characteristic, history, division and use of idioms. The theory is followed by the practical part. The analysis, which deals with the agreement and difference, is placed at the end. It also includes the semantic division. Phraseological base was made from contemporary magazines. In most cases I found Czech sentences in the following periodicals: Týden, Metro, MF DNES or Instinkt. I used the BBC for searching English sentences.
