ABSTRACT OF BACHELOR THESIS

Name: Veronika Hejzlarová

Name of thesis:
The Rivermead Perceptual Assessment Battery: Its use with the people after a brain damage in relation to a performance in ADL

Abstract:
This thesis deals with problems of perception. It talks about the standardized test battery The Rivermead Perceptual Assessment Battery and its use in patients after brain damage. It is divided into theoretical and practical part. The theoretical part summarize issues about disorders of perception, information about the test battery and its relation to activities of daily living. The practical part show its practical use in two patients after brain damage.
