The bachelor essay „The significance of drug users between addiction and abstinence for field work“ deals with the concept of indigenous field work with problem drug users in a hidden drug scene. Describes the current model of employment stabilized drug users in external field programs of SANANIM co. In the empirical part deals with the number of low-threshold facilities for drug addicted clients, in practice, using indigenous field workers. Queries to the fulfillment of the objectives of social work with problem drug users using indigenous field workers and identify the reasons why it is not this way of working on a hidden drug scene too extended.
