

A new document. Educational Framework, which has effect upon the teaching inclusive of the subject Physical Education, should come in operation in 2007. The requirement of thematical plans for Physical Education will bring its modifications for teaching the game - volleyball.

The results of teaching volleyball in schools were compared and conditions of the volleyball teaching at the basic schools too. The school children's motory test, school children's inquiry, interviews with the schoolteachers and expert opinions of the conditions of volleyball teaching at the basic schools are parts of the research. The students and teachers representing two Dutch schools were involved in the research and compared with Czech ones. The schoolchildren underwent a test of the most basic game rules of volleyball.

To make the recommendation for the compiling thematical plans of volleybal school teaching was the objective of the thesis. This recommendation should be especially useful for the schoolteachers of Physical Education, who are supposed to develop and tlach plans for the Physical Education.
