

This thesis on „Computer at home and at school, having regard to the risks to the child's personality development“, discusses how to use computers in school, especially in the education, home and leisure of the child. Work emphasizes the risks resulting from improper use of information and communication technology (especially computers and the Internet) and offers solutions to minimize these risks. The aim is to acquaint the reader with the emerging phenomena due to using computers, such as the already extensive social networking, cyberbullying and "addiction" emerging on the Internet and computer games.
