

Abstract:

My Bachelor thesis was filmed for precautionary measures information sketches. These short movies named “ children and their safety“ . That contains playing scene with

various situation from their child hood . The sketch was filmed by theme and technically

skript. I used edition program named Pinnacle Studio.

Theoretic part Bachelor work set the target tuitionary scatches which is focused children and their interactive education.

Next part is about preparation and work with camcorder as well as accessories for filming.

I focused in the end to apply scatches in prectice, piece of knowledge and gain experience process of filming.
