

TITLE:

NURSERY SCHOOL ŽDÍREC NAD DOUBRAVOU

ABSTRAKT:

The subject of my bachelor's work is to record and then to create the presentation of video-programme of the nursery school in Ždírec nad Doubravou, Chrudimská Street 77, Ždírec nad Doubravou. It shows a year-round cross-section of children's activities. The presentational video-programme was made according to the theme, content script and technical script, where the editing programme Pinnacle Studio 14 and Microsoft Office Power Point were used.

The theoretical part of my bachelor's work points to the advantages of video-technology for the theme processing, the possibility of using video-programme and the usage of presentation Power Point. In conclusion I apply myself to the evaluation of presentational video-programme with the usage of technical means and its practical usage.
