

Abstract

- Title** Case study of physiotherapy treatment of the patient with the diagnosis of dermatomyositis.
- Objectives** The aim of this work is to process knowledge for dermatomyositis and evaluation of approaches which are presented in the literature mentioned below. Second objective was to evaluate the impact of physiotherapy treatment for this disease.
- Methods** The general part of the thesis includes theoretic knowledge about dermatomyositis. In the second part of this thesis I processed the case of a patient diagnosed with dermatomyositis under the leadership of an experienced physiotherapist for 10 days
- Results** We have achieved quite a significant improvement. Treatment included physical therapy and pharmacological treatment with corticoids. Corticoids have partial portion of the over-all result.
- Keywords** Dermatomyositis, polymyositis, muscle weakness.
